

# AGAPANTHUS africanus 'Storm Cloud'

**Genus:** Agapanthus **Species:** africanus

[Read More](#)

**SKU:** AGP1001

**Price:** \$0.60 - \$1.35

**Categories:** [All Varieties](#), [Evergreen](#), [Perennials](#), [Tropicals](#)

## Product Description

This agapanthus produces luxurious green foliage that tinges red in the winter months. In summer appear the large umbels of deep blue flowers that rise far above the foliage on 3-4 foot tall blackish stems in summer. This hybrid will grow in sun or part shade, with moderate water. Hardy to 20-25 degrees F. This cultivar was introduced by The Saratoga Horticultural Foundation. It is not to be confused with an older selection of the same name made by Jimmy Gridlian and sold by Plants Delight Nursery. Compared to A. 'Ellamae': Storm Cloud is a slightly smaller plant with smaller flowers of a darker blue. full sun part shade zones 8-11. Produced by tissue culture.

# AGAVE 'Blue Flame'

**Genus:** Agave **Species:** hyb. **Cultivar:** 'Blue flame'

[Read More](#)

**SKU:** AGA1017

**Price:** \$0.75 - \$1.75

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [RTT Originals](#), [Succulents](#)

## Product Description

Rancho Tissue Original: Produced by tissue culture. Agave 'Blue Flame' - This is a beautiful succulent that forms clumps with rosettes which individually are 2 1/2 feet tall by to 3 feet wide. Older clumps build up to form large dense masses to up to 5 feet tall or more. The flexible blue-green leaves spineless margins and only a terminal spine. The blue cast to the leaves form from a glaucous waxy cuticle that covers the surface. Plant in full sun except in hot inland and desert gardens where light shade will prevent scorching of the foliage. Irrigate little or regularly for more vigor. Hardy to at least 25 F. The name 'Blue Flame' is both in reference to the blue in the foliage and also to the shape of the plant, which resembles a gas flame with its gracefully incurved leaf tips

## AGAVE 'Blue Glow'

**Genus:** Agave **Species:** hyb. **Cultivar:** 'blue glow'

[Read More](#)

**SKU:** AGA1018

**Price:** \$0.75 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [RTT Originals](#), [Succulents](#)

### Product Description

Rancho Tissue Original: Our tissue culture lab produced Agave 'Blue Glow' a beautiful smaller Agave with solitary rosettes slowly growing to 18 inches tall and 2 feet across with 1 foot long by 1-1 1/2 inch wide blue green leaves that have red edges. Our selection is unique to other 'Blue Glow' selections in that it does not have yellow leaf margins.

## Agave 'Corona del Diablo'

**Genus:** Agave **Cultivar:** 'Corona del Diablo'

[Read More](#)

**SKU:** AGA1069

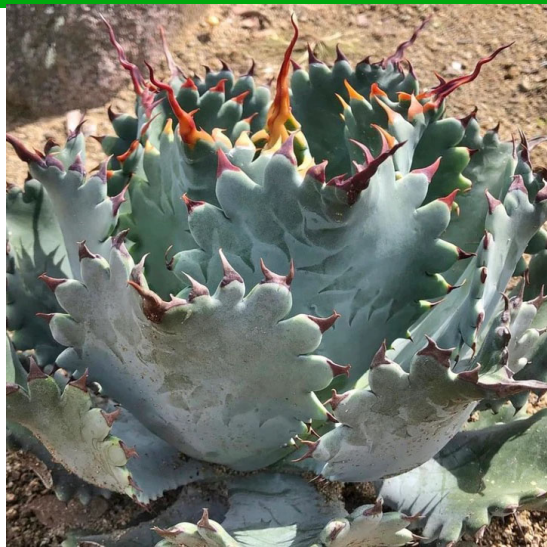

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

### Product Description

Agave shawii x potatorum 'Corona del Diablo': This brand new magnificent plant was created by our breeders This particular selection that we tissue cultured was chosen from all the seedlings. Blue leaves with bright red edges and long 4inch spikes at the end of each leaf create a drama not usually seen. Medium sized plant. Hardy to 28F

# Agave 'potatorium x isthmensis'

**Genus:** Agave **Cultivar:** potatorium x isthmensis

[Read More](#)

**SKU:** AGA1070

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

## Product Description

Agave potatorium x isthmensis: Glorious new agave tissue cultured by us after being chosen from thousands seedlings. Impressive imprints appear on the back of each leaf as well as each leaf has multicolor tips. Truly a showstopper. Midsized, Fast grower. Drought tolerant. Full sun hardy to 25F

# AGAVE aff. colorata

**Genus:** Agave **Species:** aff. colorata **Cultivar:** 'Supreme'

[Read More](#)

**SKU:** AGA1006

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Spirits](#), [Succulents](#)

## Product Description

Agave aff. colorata (Mescal Ceniza) - This rosette-forming succulent agave from coastal northwestern Sonora, Mexico is a slowly growing ,rosette-forming plant that reaches to around 2 feet tall by nearly as wide. The 5 to 7 inch wide rough textured blue-gray leaves have undulating and strongly toothed margins and there is a white patterning on the leaf face. This plant is usually solitary and does not often send up many plants around the main rosette. When the plant matures (around 15 years) it blooms in spring with red buds opening to yellow and orange flowers in a panicle on a 10 foot tall stalk. Plant in full sun with good drainage. Water infrequently. Hardy to 18°F.zones8-11 Term aff. refers to the fact that the selection we are tissueing is similar but not identical to the species colorata.

## AGAVE albopilosa 'Tufts'

**Genus:** Agave **Species:** guiengola

[Read More](#)

**SKU:** AGA1001

**Price:** \$3.50

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

### Product Description

Amazing agave produced from tissue culture. Each leaf has a small tuft of white on the end of it. Dramatic and hardy. Sun lover and tolerates cold. zones 8-11

## AGAVE Americana

**Genus:** Agave **Species:** americana

[Read More](#)

## AGAVE attenuata 'Blue Fantastic'

**Genus:** Agave **Species:** attenuata

[Read More](#)

**SKU:** AGA1055

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

Product Description

Agave attenuata Blue Fantastic, new from Rancho Tissue Technologies, adds to the popular line of tissue-cultured blue-leaved agaves. This sun-loving plant has dramatic, wide tapering leaves in a gorgeous dusk blue hue. Blue Fantastic reaches approximately 3 feet across and 3 feet to 4 feet tall, and tolerates cold for short periods of time. Easy to grow with no sharp teeth. Others in the blue agave group include Blue Glow, Blue Flame, Blue Emperor, Blue Wave and A. potatorum Cameron Blue.

AGAVE attenuata 'Blue Olivia'

Genus: Agave Species: attenuata

[Read More](#)

SKU: AGA1056

Price: \$0.70 – \$1.85

Categories: [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

Product Description

Rancho Tissue Technologies introduces Agave attenuata Blue Olivia, a new addition to the industry-favorite blue agave line. Produced from tissue culture, Blue Olivia grows very upright producing wide broadsword-like leaves without sharp teeth. This easy grower loves full sun, reaches almost 4 feet tall and spreads to about 3 feet. Blue Olivia is cold tolerant, standing up to freezes for short periods.

AGAVE attenuata 'Boutin Blue'

Genus: Agave Species: attenuata

[Read More](#)

SKU: AGA1003

Price: \$0.70 – \$1.85

Categories: [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

Product Description

Fabulous agave attenuata cultivar produced in tissue culture for year round availability. It is much bluer and has wider leaves than A. attenuata and the flower stalk is erect where A. attenuata droops over. Culture and growth patterns are otherwise similar to the species. Grows to about 3-4 feet tall by as wide. Hardy to about 28 degrees F. Previously known as Agave attenuata 'Huntington Blue' and Agave attenuata 'Nova'.

## Agave attenuata 'Boutin Blue' x titanota 'True Beauty'

**Genus:** Agave attenuata **Species:** Hybrid 'Boutin Blue' x titanota 'True Beauty'

[Read More](#)

**SKU:** AGA1072

**Price:** \$0.70 - \$1.75

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

### Product Description

Mature Height: 3'-4' Mature Width: 3'-4'. An evergreen succulent perennial which produces large elegant rosettes of wide, flexible blue-green leaves.

## AGAVE bovicornuta

**Genus:** Agave **Species:** bovicornuta **Cultivar:** 'Cow Horn Agave'

[Read More](#)

**SKU:** AGA1004

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Spirits](#), [Succulents](#)

### Product Description

Agave bovicornuta - A very attractive small to medium sized solitary growing agave from rocky slopes between 3,000 and 6,000 feet in elevation in western Mexico (Sonora, Sinaloa and Chihuahua) that grows to 2 ½ to 3 feet tall by 4 to 5 feet wide with an open rosette of 24 to 30 inch long by 5 ½ to 6 ½ inches wide yellow-green to medium green leaves that are widest in the middle. The leaf blades are attractively edged with large reddish teeth on large teats, some recurving back towards the base and others towards the leaf tip, which has a short stout terminal spine. The broad leaf surfaces are further decorated by impressions (crenulated bud imprints) made by the margins of other leaves as they emerge from the center of growth and the new leaves have an attractive satiny finish. When the plant matures, which usually takes 12 years or more, it produces a 16 to 23 foot tall branched inflorescence bearing 2 inch long yellow and green flowers As this plant does not sucker, it will need replacement after flowering . Plant in full sun to light shade (required in hot interior valleys and deserts) in a well drained soil and irrigate infrequently or more occasionally for more rapid growth. Noted as hardy to around 20° F.zones 8-11

# Agave bracteosa 'Calamar'

**Genus:** Manfreda (false agave) **Cultivar:** 'Chocolate Chips'

[Read More](#)

**SKU:** AGA1061

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

## Product Description

Agave bracteosa 'Calamar' (Solitary Candelabrum Agave) - A selection made of the typically clump forming Candelabrum Agave that is solitary or produces only a few offsets. As with the species this plant is a relatively slow growing succulent with 1 foot tall by 18" wide rosettes of unarmed (spineless) pale green leaves. The leaves, which usually number 20 or fewer emerge vertically in the center and arch gracefully back towards the outside of the plant. When plants mature a 3 to 5 foot tall spike bears a dense terminal cluster of white flowers; distinctive from all other Agave. After flowering the main rosette slowly dies but younger suckers perpetuate the plant. Fairly drought tolerant in coastal gardens although performs best with occasional irrigation and requires it in hotter inland sites. Plant in full sun to light shade in well-drained soil. Hardy to 10 F. A good tolerance to both heat and cold but not overly wet soils. Euphorbia milii 'Salmon' Beautiful selection of Thai hybrid. Plant to 3 ft tall with salmon color flowers to 2 inches wide. Produced by tissue culture to produce a very attractive plant without the long stem found in cuttings. Year round flowering. Drought tolerant. Hardy to 30-32 degrees. Euphorbia milii 'Purple Leaf' Beautiful selection of Thai hybrid. Plant to 3 ft tall with pink flowers and the back of the leaf is purple, flowers to 2 inches wide. Produced by tissue culture to produce a very attractive plant without the long stem found in cuttings. Year round flowering. Drought tolerant. Hardy to 30-32 degrees. Euphorbia milli 'Cherry Cobbler' Beautiful selection of Thai hybrid. Plant to 3 ft tall with bright red flowers. Flowers to 2 inches wide. Produced by tissue culture to produce a very attractive plant without the long stem found in cuttings. Year round flowering. Drought tolerant. Hardy to 30-32 degrees. Euphorbia milii 'White' Rare selection of Thai hybrid. Plant to 3 ft tall with white flowers. Flowers to 2 inches wide. Produced by tissue culture to produce a very attractive plant without the long stem found in cuttings. Year round flowering. Drought tolerant. Hardy to 30-32 degrees. Euphorbia milii 'Amarillo' Beautiful selection of Thai hybrid. Plant to 3 ft tall with bright red flowers. Flowers to 2 inches wide. Produced by tissue culture to produce a very attractive plant without the long stem found in cuttings. Year round flowering. Drought tolerant. Hardy to 30-32 degrees.

## AGAVE celsii 'Nova'

**Genus:** Agave **Species:** celsii

[Read More](#)

**SKU:** AGA1005

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

### Product Description

Produced from tissue culture this magnificent selection of Agave celsii is sure to be the show stopper of the garden. Blue color foliage, tulip shaped leaves and deep leaf imprints help make this plant distinct. Seed was originally collected from the wild by our curator than planted out here and grown into mature plants. The most striking

## Agave celsii albicans X attenuata 'Blue Haze'

**Genus:** Agave **Specie:** celsii

[Read More](#)

**SKU:** AGA1063

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

### Product Description

Agave celsii albicans x attenuata 'Blue Haze' is a medium sized agave with rosettes up to 2 feet tall and 6 to 8 inch wide and fleshy 2 foot long, glaucous-gray leaves that curve gracefully upwards. The leaves have a soft terminal spine and minute, backward curving, brown spines on the edge of the leaves. Plant in full sun or light shade.

# Agave chazaroi

**Genus:** Manfreda (false agave) **Cultivar:** 'Chocolate Chips'

[Read More](#)

**SKU:** AGA1062

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

## Product Description

Agave chazaroi A beautiful and recently described species of Agave that was discovered near Tequila, Jalisco, Mexico at around 3300. It forms relatively open rosettes to 5 feet wide with broad stiff glossy deep green young leaves, broadest in the middle, with slightly wavy narrow reddish brown margins - older leaves a paler yellow green. Young plants have small spines along the leaf margins but aside from the terminal spine, the mature leaves are nearly spineless, with only small teeth-like spines near the leaf base. Hardy to 32 degrees. May require partial shade in extreme heat.

# AGAVE colorata x celsii Nova 'Blue Wave'

**Genus:** Agave **Species:** colorata

[Read More](#)

**SKU:** AGA1046

**Price:** \$0.70 - \$1.85

### Product Description

Fabulous new release from tissue culture. Spineless agave we have all been waiting for!

## AGAVE ferdinand regis

**Genus:** Agave **Species:** ferdinand regis **Cultivar:**

[Read More](#)

**SKU:** AGA1008

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

### Product Description

Produced from tc.Agave ferdinandi-regis (King of the Agaves) - A stunning mid size agave to 18 inches tall by as wide with an open rosette of stout triangular blue green leaves having narrow longitudinal white bud imprints that usually form a triangle shape with black tips.. Extremely hardy zones 8-11. Full sun

## AGAVE filifera ssp.schidigera

**Genus:** Agave **Species:** filifera

[Read More](#)

**SKU:** AGA1044

**Price:** \$0.70 - \$1.85

**Categories:** [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

Product Description

A medium-sized species, about 1.5-2.5 feet tall by 2.5-3 feet across. The tall, flower stalk is loaded with hundreds, perhaps thousands of 1.5 inch long (4 cm) flowers that are medium to deep red or even purplish.

AGAVE geminiflora 'Rasta Man'

Genus: Agave Species: geminiflora

[Read More](#)

SKU: AGA1009

Price: \$0.70 - \$1.85

Categories: [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

Product Description

Agave geminiflora (Twin-flowered Agave) - This unique agave has narrow, dark green unarmed leaves that are very flexible and lined with filaments for added drama. These leaves, which often number in the 100's, cascade from the center of the plant forming a dense rounded rosette to 2 to 3 feet tall by as wide. When plants mature the plants will initiate flowers which are formed in pairs on an unbranched spike that rises 8 to 10 feet. Plant in full sun along coast and part sun to light shade in hot inland gardens. Drought resistant, but looks better with some summer watering. Hardy to 25 F.

AGAVE ghiesbreghtii

Genus: Agave Species: ghiesbreghtii

[Read More](#)

SKU: AGA1045

Price: \$0.70 - \$1.85

Categories: [Agaves](#), [All Varieties](#), [Drought Tolerant](#), [Evergreen](#), [Perennials](#), [Succulents](#)

Product Description

This agave that has individual rosettes to 30 inches wide by 2 feet tall. The 3 to 4 inch wide leaves are widest toward the middle, slightly guttered on the upper surface, and have attractive and varied contrasting leaf color. When plants mature and flower, often during spring, the greenish-purple flowers are borne on 8-13 feet unbranched spikes. Plant in full sun.
